

# Custom Lab Template for NextGen Ambulatory EHR Makes Ordering Tests Faster and Easier

## Order Tests Faster and Easier with our Custom Lab Template

Many providers are looking for an easier way to find and order tests without using the stock template that comes out of the box with the latest version of NextGen EHR. Some try to make template changes but those take time to get completed and are the same for all providers. Wouldn't it be nice to see all the tests ordered for your patient, or the most common tests for your practice, or your favorite tests?

Our Custom Lab Template gives users the ability to customize the ordering process to their individual preferences without the need for template editing. Designed with the provider workflow in mind, users can create and set their own default test lists and select which three lists are displayed as their default. The template comes with pre-loaded lists including : Common Tests by Practice, Common Tests by Provider, History of Tests for Patient, etc. The template is easy to set up, easy to use and cost effective. Contact us and we will show you how we can make using your system Faster and Easier!

- Providers choose/build lists of their most common/favorite tests without needing template editing help
- Pre-defined lists provided: Common tests by Practice, Common test for Provider, History for Patient, etc.
- Clinics can configure their own custom groupings of test to order with 1 click

**Today's Assessments:** (Select a diagnosis to associate with the desired lab(s) below.)

#	Diagnosis Description	Code
1	Abdominal pain	R10.9
2	Anxiety disorder, unspecified	F41.9
