# eMedApps™

Integrate Accuvax with your NextGen System

Optimize Your Workflow for Immunizations

Our Accuvax interface sends immunization orders from NextGen to Accuvax. This eliminates the need to enter orders into both the EHR and the device. Errors in dispensing are also reduced as the order for the correct immunization is already in the device as the time of dispensing. updates are sent back to NextGen including manufacturer, lot numbers, Medication expiry date, and NDC information.
